Hardware features

Material Plastic

Electrical

Frequency	125kHz
Wireless frequency	2.4GHz

Environment

Operating Temperature	0°C - +55°C
Moisture resistance	No

Dimensions

Sales Codes

Net2 - Hands free Keycard	690-333
---------------------------	---------

Hands-free access control means the token that identifies a user is read from within a pocket or handbag. This is useful for gates and barriers, loading doors and where disabled or elderly people require access. The hands-free keyfobs, in conjunction with hands-free interface, achieve this using the unique wireless technology.

Tokens work in active and passive modes. They give a range of between 0.85m and 2.5m on any reader equipped with a hands-free interface. They work in passive mode with all other Paxton proximity readers. Enrolled onto the Net2 system using the standard desktop reader.
